

Overall Coordination

Munich Test Area

Installing and operating **e-mobility stations** with recharging infrastructure, innovative sensors, IT solutions and a diversified e-sharing offers

Measures to use road space efficiently and **increase leisure and residential quality**

Developing **expanded e-sharing services** for users and operators

e-delivery traffic for an emission-free supplies to the model quarters

Citizen participation

Hamburg Test Area

Installing and operating **e-mobility stations** (switchh points) with recharging infrastructure, innovative sensors, IT solutions and diversified e-sharing offers

Developing **expanded e-sharing services** for users and operators

Citizen participation

E-carsharing of autonomous vehicles

Application and framework scenarios for e-carsharing of autonomous vehicles

Studying **potentials** for e-carsharing of autonomous vehicles

Providing **e-carsharing of autonomous vehicles** in Munich test area

Studying **user acceptance** of autonomous e-carsharing

Demonstrations of e-carsharing of autonomous vehicles in Munich

Adding value by making uses of synergies between the test areas Hamburg & Munich and the measures implemented there

Accompanying research, evaluating processes and effects
